

## **LiProPac Battery Storage Cabinet**

A solution designed for storage of  
UN 3480 Lithium ion batteries

We offer an efficient and sustainable solution on how to handle, store and transport lithium batteries safely throughout the entire life cycle

Outer dimensions: 2095 x 1000 x 620 mm  
Inner dimensions: 1930 x 925 x 560 mm

## LiProPac Battery Storage Cabinet

LiProPac battery cabinets are fire-insulated and are tested for external fire according to SP method 2369.

The cabinet has a central unit for monitoring and optical detectors. It also has a battery backup that offers guaranteed power protection for the FirePro fire-fighting extinguishing system.

Four perforated shelves are included and the cabinet is also equipped with a warning sign containing instructions mounted on the door, which is lockable.

There is possibility to install charging stations as well as external systems for alarms.

## FirePro fire extinguisher

- » Highest extinguishing efficiency per unit weight.
- » Takes up little space.
- » No impact on the ODP (ozone layer).
- » No impact on GWP (global warming).
- » No electrical conductivity.
- » No corrosion impact.
- » Lifespan 15 years.
- » Not pressure-adding.
- » Green lable certificate.
- » The only aerosol that is IMO Solas certified for shipping.
- » Does not cause any extinguishing water that needs to be taken care of.
- » Models for ATEX environments are also available
